

## Momentum Enhanced Factor 5 Portfolio

June 2012

### Investment strategy

This investment portfolio is aimed at members of a retirement fund who are in the consolidation phase of investing. These members would have a medium-term investment horizon and should be invested in a balance of growth and defensive assets. This balance is achieved by having a 45% benchmark allocation to local equities and property as well as global equities to achieve growth. The remaining 55% is allocated to investments that should preserve the purchasing power of the capital accumulated. The portfolio will incorporate all opportunities identified and performance fees may be paid to investment managers should they sufficiently enhance investment returns after fees.

### Benchmark allocation

Asset Class	Allocation	Benchmark
Local equities	27.50%	FTSE/JSE Shareholder Weighted All-Share Index
Local property	10.00%	FTSE/JSE SA Listed Property Index

### Cumulative investment returns for one year

### Asset allocation

### Investment portfolio mandate

The long-term return objective of this portfolio is inflation plus 5% a year over five-year rolling periods. All combinations of asset classes are considered and an optimum allocation is selected to achieve this objective with a high degree of certainty. New asset-class opportunities are continually investigated. The risk of exposure to losses in the short term is managed by maximising diversification to specialist investment managers, predominantly active strategies and asset classes.

This investment portfolio is administered and managed by Momentum Manager of Managers (Pty) Ltd registration number 2004/023064/07, is an authorised financial services provider in terms of Section 8 of the Financial Advisory and Intermediary Services Act, 37 of 2002 (FAIS Act), as amended, FSP licence number 19840. This information is not advice as defined and contemplated in the FAIS Act. The company is also registered as an administrator in terms of Section 13B of the Pension Funds Act, registration number 24/401. Investment returns for periods exceeding one year are annualised. All returns quoted are before deduction of fees, except where a portfolio includes underlying investments where fees are deducted from the return, but after the deduction of performance-based fees. The return for the global component of a portfolio is generated at month-end using the global component's last known price. The return for Consumer Price Index (CPI) is to the end of the previous month. The investment manager returns shown in the table are based on the history of Momentum Manager of Managers' investment in that particular investment manager's portfolio, and not necessarily when the investment manager was included in this portfolio. Given that past returns may not be indicative of future returns and the value of investments will fluctuate over time, independent professional advice should always be sought before making an investment decision.
