

Momentum Enhanced Factor Portfolio Range

Momentum Enhanced Factor 7 Portfolio

Factsheet at 30 June 2024

Target: CPI + 5% to 6%

Investment horizon: Seven years

Investments managed by: Momentum Outcome-based Solutions (Pty) Ltd

Momentum outcome-based investing philosophy

Investment success is about consistently maximising the probability of you achieving your investment goals – whether that is to preserve capital, generate an income stream in retirement or grow wealth within the parameters of a certain risk profile. In response to the ever-evolving investment landscape, we have constructed a range of outcome-based solutions that set their sights beyond mere benchmarks and instead focus on the things that matter the most to you – ensuring we maximise the probability of you achieving your investment goals. Outcome-based investing is about placing your goals at the centre of our investment process.

Investor profile and investment strategy

This portfolio is aimed at investors who are in the accumulation phase of investing. It has a long-term investment horizon and, therefore, the aim is to maintain an average exposure of 79.5% to growth asset classes (local and global equities and property). The portfolio consists of the full universe of asset classes, including global investments of up to 45%, and alternative asset classes. The allocation between asset classes is actively managed, taking the market environment into account. Through the optimum selection of asset classes, the probability of achieving the outcome is maximised within acceptable risk parameters. Performance fees may be paid within investment mandates, should they sufficiently enhance investment returns after fees. It is suitable as a stand-alone portfolio in retirement products, where compliance with Regulation 28 is specifically required.

Portfolio information

Launch date:	April 1999
Benchmark:	Composite: Local equity 45%; Local property 3%; Local bond 10%; Local cash 5%; Global equity 28%; Global property 3.5%; Global bond 3.5%; Global cash 2%
Target:	Inflation plus 5% to 6% over seven-year rolling periods
Reg. 28 compliant:	Yes

Risk of capital loss	Very low	Medium	Very high
Investment term	Very short	Medium	Very long

Quarterly portfolio commentary for Q2 2024

Barring a sharp rise in geopolitical tensions, the global economy appears increasingly likely to avoid a hard landing. Despite more muted expectations for policy easing relative to the start of the year, global economic activity is still expected to continue expanding, albeit at a slower pace and below historical averages. We believe the durability of the recovery, we believe, does not depend on significant policy easing but will be supported by still-robust wage growth, declining inflation and ongoing tightness in labour markets.

Although slowing United States (US) growth into 2025 could underpin both global bonds and equities due to the associated more positive rate cut expectations, it will be less supportive for equities should profit fears emerge. Historically, global equities have performed robustly when the US rate-cutting cycle was not accompanied by a recession, whereas they tend to decline somewhat during recessions. Expensive US valuations are the main return risk for global equities going forward. US bonds are presently trading at a discount to US equities, a situation seldom witnessed in the 21st century.

South Africa (SA) has now entered a phase where collective decision-making is crucial for effective governance. As such, the stability of the incoming government will hinge on the political maturity of the political parties represented in parliament. We anticipate that business and consumer confidence will rise in hopes of continued structural reforms, leading to a better economic path. There is potential for growth to exceed our base case of 1% this year and 1.7% next year as accountability and governance improve and policy and reform continuity prevail. Further rand strength could result from developed market central banks lowering interest rates in response to disinflation, though significant appreciation will depend on empirical growth evidence. As tail risks to the currency recede, upside threats to our inflation view of 5.3% this year and 4.5% next year are likely to wane. Should growth outperform expectations, there could be room for more significant rate cuts than the 100 basis points we currently forecast over the next year.

The valuation metrics of the SA equity market have reset to consistently lower levels since the pandemic. SA equities remain very under-owned by local and global portfolio managers, enhancing their rerating potential should there be positive surprises on the domestic economic growth front or if a global risk-on environment takes hold. SA bond yields are attractive against their history in real terms, and relative to global yields, with part of the high real yield differential due to a high fiscal risk premium.

The portfolio returned 3.5% for the quarter which was below the benchmark.

Notes

Changes were made to the strategic asset allocations on 1 July 2023.

The benchmark for the local property component was changed on 1 October 2021 from the FTSE/JSE SA Listed Property Index to the FTSE/JSE All Property Index.

On 1 November 2020, the real return expectation for this portfolio was revised from inflation plus 7% to a range of inflation plus 5% to 6%.

Changes were made to the strategic asset allocations on 31 October 2020.

Disclosures

The investment policy is underwritten by Momentum Metropolitan Life Limited, which is a registered insurer under the Insurance Act, 18 of 2017. This investment portfolio is administered and managed by Momentum Outcome-based Solutions (Pty) Ltd, an authorised financial services provider (FSP No. 19840) under the Financial Advisory and Intermediary Services Act No.37 of 2002 (FAIS Act), as may be amended and/or replaced from time to time, and a part of Momentum Metropolitan Holdings Limited, rated B-BBEE level 1.

Under no circumstances shall Momentum Metropolitan Life Limited, its affiliates, directors, officers, employees, representatives or agents (the "Momentum Metropolitan Parties") have any liability to any persons or entities receiving the information made available in this factsheet for any claim, damages, loss or expense, whether caused by Momentum Metropolitan Life Limited or the Momentum Metropolitan Parties' negligence or otherwise, including, without limitation, any direct, indirect, special, incidental, punitive or consequential cost, loss or damages, whether in contract or in delict, arising out of or in connection with information made available in this factsheet, whether relating to any actions, transactions, omissions resulting from this information, or relating to any legal proceedings brought against you as a result of this information, and you agree to indemnify Momentum Metropolitan Life Limited and the Momentum Metropolitan Parties accordingly.

Investment returns for periods exceeding one year are annualised. All returns quoted are before deduction of fees, but after the deduction of performance fees on global underlying investments (where applicable). All returns are daily time-weighted returns. The return for the global component of a portfolio is generated at month-end using the global component's last known price. The return for Consumer Price Index (CPI) is to the end of the previous month.

For investments in collective investments schemes (CIS), please refer to the minimum disclosure document (MDD), which is available from the respective CIS manager. The MDD contains important information relating to investment in the respective CIS.
