

Momentum Multi-Managed Bond Portfolio

September 2020

Investment strategy

This traditional bond investment portfolio is a local, multi-managed, bond portfolio, consisting of actively managed bond investments, where different strategies are used to enhance returns, including duration allocation and credit exposure. The portfolio has limited exposure to credit instruments as well as limitations in terms of active duration allocations. Due to its nature, the portfolio offers the investor the opportunity to take advantage of interest rate cycles, thereby maximising income and capital growth. The portfolio may from time to time include specialised derivative instruments.
